Building and Grounds Business

*It was the general consensus that the members of Our Lady of Mount Carmel should be sought regarding the future replacement of the bell tower.

The original bell from the old church is estimated to weight between

6,000 - 7,000 lbs. and the other two are imitation bells. Fr. Estimate a replacement bell tower would cost \$40,000 - \$50,000 and would only have a height of 35-40ft.

Because of the size and weight of the old bell the tower would have to be Individually engineered. In addition the two imitation bells would not be included.

*Another item of discussion was an easement request made by a member of the parish. Access to parish grounds would be needed to connect to the city sewer system. Amendments to the legal agreement as suggested by the Archdiocese were agreed with.

Motion to adjourn by Tim 6:55. No objections
